

PROFESSIONAL SUMMARY

Junior front-end developer and Computer Engineering student with hands-on experience redesigning the complete **Cod24** website interface. I build responsive, component-based interfaces with React, JavaScript, TypeScript and Tailwind CSS, and I am ready to contribute in a Junior Front-End Developer role.

EXPERIENCE

Front-End Developer Intern Cod24

Jul 2026 - Present

- Redesigned and developed the complete website interface with React and Tailwind CSS.
- Built reusable, component-based UI elements with JavaScript and TypeScript.
- Implemented React Router, integrated back-end services with Axios, and collaborated with a back-end developer and project manager.

EDUCATION

B.Sc. in Computer Engineering

Semnan University - 2024 to Expected Summer 2028

Achievement: 1st place in an internal team-based programming competition at Semnan University.

SELECTED PROJECTS

Login Page (React.js)

Responsive login interface with API integration, error feedback and loading-state management.

React - Axios - Tailwind CSS

Fashion Store (React)

API-powered product catalog with product detail pages and client-side routing.

React - React Router

Bilingual Portfolio

Persian-English portfolio with RTL/LTR support, light and dark themes, and responsive design.

React - Vite - Tailwind CSS
